JS-based app for taking a cat to different cities using an auto-complete search bar and a rotating background

EXPERIENCE

Contract Junior Web Developer | 8/2020 – Present
InVintory
- Use Vue.js modules and Stylus to collaboratively and independently build and improve UI elements for the UX, performance, interactivity and accessibility of InVintory's web applications, which provide elevated wine collecting experiences including 3D cellar management
- Work closely with the design team to discuss user-centric designs and the backend team to design APIs and DB structures; help plan the product architecture

Contract React Developer | 5/2020 – 7/2020
Too Many Hats
- Built a React-based blog site under the supervision of a senior engineer to attract new clients
- Used React, Gatsby, GraphQL, Contentful, Styled Components and Github

Shopify Developer | 5/2020 – 7/2020
ShopHERE (developed by City of Toronto, Digital Main Street and Shopify)
- Collaborated with City of Toronto and Digital Main Street to support small businesses that have been impacted by COVID-19 by volunteering to build ecommerce Shopify sites

Management Consultant | 3/2018 – 7/2018
The Accelerator Centre, Waterloo, ON (Award-winning accelerator center for tech startups)
- Provided recommendations to promote inclusivity for women in tech startup sector
- This opportunity led me to think to myself, 'Why don't I work as a developer in tech myself?'.
